DigiKhaato Jewellery (JWL) - Completed Features User Guide

Shopkeeper, Salesman, Cashier ke liye Simple Guide (Non-Technical)

Version: 1.0

Date: 07 May 2026

Scope: Sirf woh features jo abhi system me complete aur usable hain

Is Document ka Scope (Bahut Important)

Yeh guide sirf completed features ke liye hai.

Isme koi future ya half-done feature include nahi hai.

Aaj ke date par is guide me cover features:

1. Billing me fast Item Search + Barcode + Auto Fill
2. Invoice me IRN safety warning (Simulated IRN disclaimer) + QR display
3. Party Outstanding page + ageing + movement + manual adjustment
4. Karigar edit drawer + active/inactive control
5. Inventory me Purity Tracking view + HUID Tracking view

Table of Contents

1. Kaun user kya use kare
2. Feature 1: Fast Item Search Billing me
3. Feature 2: IRN Safety Warning aur QR
4. Feature 3: Party Outstanding (Recovery Register)
5. Feature 4: Karigar Edit aur Inactive Control
6. Feature 5: Purity & HUID Tracking
7. Form Fields and Validations (sirf completed features)
8. Formula aur Calculation (simple language)
9. Security aur Safe Use Rules
10. Daily Working Flow (Counter se Closing tak)
11. Limitations (abhi kya nahi hai)
12. FAQ

1) Kaun user kya use kare

User Type	Main kaam
Salesman	Item search, line add, bill draft
Cashier	Payment split, invoice issue, print/share
Manager	Outstanding follow-up, manual adjustment, karigar update
Owner/Admin	User control, compliance check, daily audit

2) Feature 1: Fast Item Search Billing me

Iska fayda

- * 500+ items me bhi item jaldi milta hai
- * Barcode scanner se direct pick hota hai
- * Line me metal, purity, weight, rate auto-fill hota hai
- * Manual typing mistakes kam hoti hain

User ka step-by-step

1. `Jewellery > Billing > New Invoice` kholo
2. `Add line` dabao
3. Item field me SKU / Barcode / HUID type karo
4. Minimum 2 character ke baad result list aayegi
5. Item select karo
6. System auto-fill karega line details

Auto-fill kya hota hai

- * Metal code
- * Purity code
- * Gross wt
- * Net wt
- * Stone wt
- * Rate per gram (live rate match hone par)
- * HUID chip

Barcode behavior

- * Scanner se code enter + Enter
- * System direct item scan API call karta hai

BA/Designer Wireframe (WF-01)

```
.....
. WF-01 : NEW INVOICE - LINE ITEM SEARCH .
.....
. [01] Bill Type   [02] Customer Search   [03] Place of Supply .
.....
. LINE ITEM 1 .
. [04] Item Search (SKU / Barcode / HUID) .
.   -> dropdown result list (max 30) .
.....
. [05] Description      [06] HSN .
. [07] Metal   [08] Purity [09] Gross [10] Net [11] Stone [12] Rate/g .
. [13] HUID chip (read only if item me available) .
.....
. [14] Making Mode [15] Making Rate [16] Wastage% [17] GST% .
.....
. [18] + Add line .
. [19] Line Total .
.....
```

Interaction Notes:

- [04] par 2 character se pehle search API fire nahi hota.
- Scanner use karne par manual dropdown wait nahi hota.
- Selected item clear karne ke liye chip ke saath "Clear" available hai.

3) Feature 2: IRN Safety Warning aur QR

Iska fayda

- * Staff ko clear warning milti hai ki IRN legal GST portal par submit nahi hua
- * Galat compliance claim se bachav hota hai
- * Simulated IRN clearly mark hota hai

User ka step-by-step

1. Issued invoice detail page kholo
2. B2B Tax Invoice me agar simulated IRN hai to amber warning dikhegi
3. `More > Generate IRN` par click karo
4. Disclaimer padho
5. Checkbox tick karo
6. Tabhi `Generate IRN` button active hoga

System behavior

- * IRN panel me `SIMULATED` badge dikhega
- * QR code image format me dikhega
- * Warning text clear bolta hai: GSTN/IRP pe register nahi hua

BA/Designer Wireframe (WF-02)

WF-02 : INVOICE DETAIL - IRN SAFETY PANEL
[01] Amber Compliance Banner
"IRN not submitted to GSTN - internal reference only"
[02] E-Invoice Details
[03] IRN Value (long hash text)
[04] Badge: SIMULATED
[05] QR Code (image block)
[06] More Menu -> Generate IRN
WF-02A : GENERATE IRN CONFIRM MODAL
[01] Title: Generate Reference IRN
[02] Amber warning text block
[03] Checkbox: "I understand this is not GST portal IRN"
[04] Cancel Button [05] Generate IRN (disabled until checked)

4) Feature 3: Party Outstanding (Recovery Register)

Iska fayda

- * Kisko paisa lena hai, ek screen me clear
- * Ageing bucket se follow-up priority milti hai
- * Party movement history available hai
- * Manual adjustment controlled tareeke se possible hai

User ka step-by-step

1. `Jewellery > Outstanding` kholo

2. Ageing cards (0-30, 31-60, 61-90, 90+) dekho
3. Party row click karo
4. Drawer me movement history dekho
5. Zarurat ho to authorized role se manual adjustment karo

Screen pe kya dikhta hai

- * Total receivable amount
- * 90+ overdue count
- * Party wise cash balance and metal balance (grams)
- * Last 50 movements

BA/Designer Wireframe (WF-03)

```

.....

. -----

```

5) Feature 4: Karigar Edit aur Inactive Control

Iska fayda

- * Duplicate karigar banana kam hota hai
- * Mobile/rate update easy hai
- * Inactive karigar ko new assignment se roka ja sakta hai

User ka step-by-step

1. `Jewellery > Karigar` kholo

2. Karigar row me `Edit` click karo
3. Drawer me details update karo
4. `Active` checkbox se inactivate/reactivate karo
5. `Save changes` dabao

Important behavior

- * Inactive karigar list history me rehta hai
- * Inactive hone par new assignment avoid hota hai

BA/Designer Wireframe (WF-04)

.....	
. WF-04 : KARIGAR EDIT DRAWER .	
.....	
. [01] Name *	[02] Mobile *
. [03] Specialization	[04] Default Wastage %
. [05] Default Labour	[06] PAN
. [07] Code (read only)	[08] Aadhaar last 4
. [09] Active checkbox (disable -> no new assignments)	

. [10] Cancel	[11] Save Changes
.....	

6) Feature 5: Purity & HUID Tracking

6.1 Purity Tracking View

Use: stock purity-wise dekhna (in-stock summary)

Aap dekh sakte ho:

- * Metal + purity card
- * Item count
- * Net/Gross/Charge weight totals
- * Purity click karke item list filter

Wireframe (WF-05)

.....	
. WF-05 : PURITY TRACKING .

. [02] Summary Cards (per purity) .	
. GOLD 22K items net wt gross wt charge wt .	

. [03] Filtered Item List .	
. SKU Design Net wt Open link .	
.....	

6.2 HUID Tracking View

Use: kis item me HUID hai / missing hai quickly check karna

Aap dekh sakte ho:

- * Search by HUID or SKU
- * Filter: All / Has HUID / Missing HUID / Hallmarked
- * Hallmark status badge

Wireframe (WF-06)

```
.....
. WF-06 : HUID TRACKING
. ....
. [01] Search HUID / SKU
. [02] Filter dropdown
. ....
. [03] Result Grid
.     SKU | Design | HUID | Metal/Purity | Hallmark | Open
. ....
. [04] No HUID row -> "No HUID" danger badge
. ....
```

7) Form Fields and Validations (Completed Features Only)

7.1 Billing Item Search Line

Field	Rule
Item Search	Minimum 2 character par search open
Search results	Max 30 rows display
Invoice Type = Credit Note	Search SOLD items
Invoice Type normal	Search IN_STOCK items
HUID	Agar item me ho to chip me show

7.2 IRN Disclaimer Modal

Field	Rule
Disclaimer checkbox	Tick kiye bina Generate IRN allow nahi
Simulated IRN	Detail panel me SIMULATED badge mandatory

7.3 Outstanding Adjustment

Field	Rule
Notes	Minimum 5 characters
Date	Future date allowed nahi
Amount/Metal	At least ek delta dena zaroori
Permission	Sirf admin/manager/jwl_admin/jwl_manager

7.4 Karigar Edit

Field	Rule
Mobile	10 digit format
PAN	Format: AAAAAA9999A
Active Toggle	OFF = new assignment stop

7.5 HUID Validation

Field	Rule
HUID	6 uppercase alphanumeric
Duplicate non-empty HUID	Allowed nahi (same tenant me unique)

8) Formula aur Calculation (Simple Language)

8.1 Old Gold Deduction

Formula: $\text{Pure grams} = \text{Gross wt} \times (\text{Purity\%} / 100)$

Formula: $\text{Deduction value} = \text{Pure grams} \times \text{Buy rate per gram}$

Example:

- * Gross wt = 20g
- * Purity = 75%
- * Buy rate = INR 5,000/g
- * Pure grams = $20 \times 0.75 = 15\text{g}$
- * Deduction = $15 \times 5,000 = \text{INR } 75,000$

8.2 Making Charge

System mode ke hisab se calculate karta hai:

- * PER_GRAM $\rightarrow \text{making rate} \times \text{net wt}$
- * PCT_METAL $\rightarrow (\text{metal value} \times \text{making\%}) / 100$
- * PER_PIECE $\rightarrow \text{making rate} \times \text{pieces}$

8.3 Wastage Amount

$\text{Wastage} = (\text{Metal value} \times \text{wastage\%}) / 100$

8.4 GST Split

- * Same state $\rightarrow$ GST ka half CGST, half SGST
- * Different state $\rightarrow$ full IGST

8.5 Round Off

Total ko nearest rupee round kiya jata hai.

Difference 'round off' me show hota hai.

8.6 Outstanding Sign Meaning

- * Positive balance $\rightarrow$ customer se paisa lena hai
- * Negative balance $\rightarrow$ customer ka credit/advance pada hai

9) Security aur Safe Use Rules

1. Password aur OTP kisi ko share na kare.
2. Shared counter system pe kaam khatam ke baad logout kare.
3. Unknown link se portal open na kare; sirf official URL use kare.
4. IRN simulated warning ignore na kare.
5. Manual adjustment bina reason ke na kare.
6. Daily end me high-value entries owner verify kare.
7. Mobile/laptop lost ho to same day password reset + admin alert kare.

10) Daily Working Flow (Counter se Closing tak)

1. Morning: rates + outstanding check
2. Counter sale: customer select -> item search -> line verify -> payment
3. Issue invoice and share
4. Agar B2B hai to IRN warning dhyan se dekho
5. Evening: outstanding follow-up list and mismatch check
6. Logout and close

11) Limitations (abhi kya nahi hai)

1. Yeh guide sirf completed features cover karti hai.
2. Full legal GST IRP integration abhi enabled nahi (simulated IRN warning flow active hai).
3. Advanced reports/export UX aur kuch compliance automations next phase me aayenge.

12) FAQ

Q1: Item search me item nahi mil raha

- * 2+ character type karo
- * Invoice type check karo (credit note me SOLD item chahiye)
- * SKU/barcode/HUID sahi daala hai ya nahi check karo

Q2: IRN generate button disable kyun hai

- * Disclaimer checkbox tick nahi hua

Q3: Outstanding adjustment save nahi ho raha

- * Notes 5 char se chhota ho sakta hai
- * Date future ho sakti hai
- * Role permission na ho

Q4: Karigar save pe error aa raha

- * Mobile 10 digit check karo
- * PAN format sahi karo

Q5: HUID error aa raha

- * 6 character uppercase alphanumeric hona chahiye
- * Duplicate HUID allowed nahi

Screenshot Placeholder List (Designer handoff)

1. Billing new invoice item-search dropdown open state
2. Billing line auto-filled state with HUID chip
3. Invoice detail amber IRN warning banner
4. IRN disclaimer modal with checkbox
5. Outstanding main screen ageing cards

6. Outstanding party detail drawer movements
7. Outstanding manual adjustment drawer
8. Karigar edit drawer with active toggle
9. Purity tracking summary cards
10. HUID tracking filtered list
